

Product Schedule – Occupancy Plus

Occupancy Plus is the original cloud-based, all-in-one reservation management system that can include a front desk system, a channel manager, a booking engine social media marketing and a website. Actual features available are based on the customer's subscription level.

Occupancy Plus is a web application hosted by GOTO PLUS and accessible via <https://occupancy.plus> on a modern web browser.

Functionality

- Front Desk Functionality
- Availability, Rates, and Inventory (ARI) Updates
- Reservation Processing
- User Management
- Reporting
- Third Party Integrations

Guest and Property Management - day to day operations like managing guests, assigning guests to rooms and scheduled room cleaning

Payment Processing - process payments and refunds for reservations.

In response to inventory management actions performed by the user, the Occupancy Plus Channel Manager, will send updates across each integrated online channel and its booking engine.

Reservations coming from integrated online channels and reservations created by hotel staff on the front desk system are received and recorded by Occupancy Plus.

Occupancy Plus provides PCI compliant user management functions including user creation and deletion, permission management and activity logging.

Occupancy Plus has built-in reporting features to help analyse revenue, statistics and channel performance.

Occupancy Plus provides third party integrations to the hotels including:

- Payment Gateways

- Analytics and Conversion Tracking
- Facebook
- Website

Connectivity

Occupancy Plus can support connections with Online Travel Agents via the channel manager (if any).
